Dear Hiring Manager,

I am writing to apply for the Software Engineer, New Grad role at MLB. I recently completed my degree in Computer Science and have developed a strong foundation in software engineering through a combination of academic work, team projects, and hands-on development experience.

I have experience building and maintaining backend services, working with APIs, and collaborating in team environments that emphasize code reviews, testing, and iterative improvement. I enjoy breaking down complex problems, learning new systems quickly, and writing clear, maintainable code that others can build on.

What draws me to MLB is the opportunity to work on large-scale, consumer-facing systems in a collaborative environment where reliability, performance, and user experience matter. I am excited about the chance to contribute to meaningful products while continuing to grow as an engineer under experienced mentorship.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my skills and interests align with this role.

best,
Zakaria Mohamed
